MEMORANDUM FOR JFK TASK FORCE

008894

TO: Document file

FROM: Eileen Dinneen

DATE: 5/15/78

RE: Secret Service Protective Cases established for the  
period covering March - December, 1963.

Upon Team IV's request for all files involving potential threats to President Kennedy's safety, 413 computer print outs were released for review. These print outs referred to files established for the months March - December, 1963. A form was created to best summarize the material found in the print outs. The following 413 sheets are a compendium of the computer materials.

MEMORANDUM

TO:: Lee Matthews

FROM: Eileen Dinneen

DATE: June 21, 1978

RE: Secret Service cases established in 1963 involving assassinations

In reviewing the 413 computer print outs on Protective Research cases set up during the time period between March and December, 1963, it became evident that the Secret Service paid some attention to foreign assassinations. Case #401 on Thelma Estella King was referred to the Service by the CIA on 3/8/63. Ms. King was alleged to be involved in an assassination plot against JFK and the President of Panama during a meeting in that country. She was reportedly involved in the assassination of former President Ramon of Panama and in a plot to overthrow the government of Panama under President Robles. Case #407 pertains to Chy Song, a military bodyguard to the Laotian foreign minister in 1963. On 4/1/64, Song assassinated Quinim Pholsena with 18 shots from his machine gun. Apparently the assassination was well planned as the other bodyguards did not react to the firing. The assassin's fate was listed as unknown. Case #409 involves Mohamed Khalifa, who on 4/11/63 mortally wounded his long time friend, foreign minister of Algeria, by shooting him in the face. The chauffeur captured the subject but his final disposition was given as unknown.

The above three cases show definite Secret Service interest in foreign affairs. However, it is questionable as to why the Diem brothers' assassination was not given a case number. Review of the files showed no mention, whatsoever, of the assassination occurring in Viet Nam prior to the planned Chicago trip of Kennedy on November 2, 1963.
